

Amerivet Securities, Inc.

26550 Silverado Court

Moreno Valley, CA 92555

(951) 242-8090

January 1, 2012

This Brochure provides information about the qualifications and business practices of Amerivet Securities, Inc. If you have any questions about the contents of this Brochure, please contact us at (951) 242-8090 or via email at elton.johnson@amerivetsecurities.com. The Information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

THIS BROCHURE DOES NOT CONSTITUTE AN OFFER, SOLICITATION OR RECOMMENDATION TO SELL OR AN OFFER TO BUY ANY SECURITIES, INVESTMENT PRODUCTS OR INVESTMENT ADVISORY SERVICES. SUCH AN OFFER MAY ONLY BE MADE TO ELIGIBLE PERSONS BY MEANS OF DELIVERY OF A CONFIDENTIAL PRIVATE PLACEMENT MEMORANDUM AND/OR OTHER SIMILAR MATERIALS THAT CONTAIN A DESCRIPTION OF THE MATERIAL TERMS RELATING TO SUCH INVESTMENT.

Amerivet Securities, Inc. is a Registered Investment Adviser. Registration of an Investment Adviser does not imply any level of skill or training. The oral and written communications of an Adviser provide you with information that you may use to determine whether to hire or retain them. Additional information about Amerivet Securities, Inc. is also available on the SEC's web site at www.adviserinfo.sec.gov.

Item 2 - Material Changes

On July 28, 2010, the United State Securities and Exchange Commission published “Amendments to Form ADV” which amends the disclosure document describing our business practices and qualifications that we provide to our clients per SEC Rules. This Brochure, dated September 30, 2011 is a new document that has been prepared according to the SEC’s new requirements and rules.

In the future, this section of the brochure will discuss only the specific material changes that were made to the Brochure and will provide you with a summary of all material changes that have occurred since the last filing of this Brochure with the SEC. This section will also identify the date of our last annual brochure update.

Pursuant to new SEC Rules, we will ensure that you receive a summary of any material changes to this and subsequent Brochures within 120 days of the close of our business’ fiscal year which is December 31st. We will provide other ongoing disclosure information about material changes as necessary. We will also provide you with a new Brochure, as necessary, based on changes or new information. Currently, our Brochure may be requested at any time, without charge, by contacting Amerivet Securities, Inc. at (951) 242-8090.

Additional information about Amerivet Securities, Inc. is also available via the SEC’s web site www.adviserinfo.sec.gov. You can search this site by using a unique identifying number, known as a CRD number. The CRD number for Amerivet Securities, Inc. is 34786. The SEC’s web site also provides information about any persons affiliated with Amerivet Securities, Inc. who are registered, or are required to be registered, as investment adviser representatives of Amerivet Securities, Inc.

Item 4 - Advisory Business Introduction

Amerivet Securities, Inc. (“Amerivet”) is a Registered Investment Adviser (“Adviser”) which offers investment advice, securities and other financial services to clients. We are registered through and regulated by the California Securities Regulation Division (“SRD”).

We provide investment advice through investment adviser representatives (“advisor”) associated with us. These individuals are appropriately licensed, qualified, and authorized to provide advisory services on our behalf. In addition, all advisors are required to have commensurate educational and industry experience.

Amerivet Securities, Inc. was founded in 1993 by Elton Johnson, Jr. who serves as President and Chief Executive Officer. Amerivet was founded as and is currently certified by the California Department of General Services as a Disabled Veteran Business Enterprise. The Registered Investment Adviser arm of Amerivet was founded in 2011 by Elton Johnson, Jr. who serves as the President and Chief Executive Officer. As a Registered Investment Adviser, we provide portfolio management services to individuals, high net worth individuals and state and teacher pension plans. We are committed to the precept that by placing the clients’ interests first, we will add value to the asset management process and earn the client’s trust and respect. We value long term relationships with our clients whom we regard as strategic partners in our business.

Services

We provide various asset management and financial planning services, with an emphasis on portfolio development and management and retirement planning and services. Our focus is on helping you develop and execute plans that are designed to build and preserve your wealth. We do not sponsor or participate in wrap fee programs.

We are a new RIA, therefore as of 9/30/2011, we do not have any assets under management nor do we have accounts for which we provide asset management services.

All accounts are managed on a non-discretionary basis which means, you have not given us the authority to determine the following without your consent:

- Securities to be bought or sold for your account
- Amount of securities to be bought or sold for your account
- Broker- dealer to be used for a purchase or sale of securities for your account
- Commission rates to be paid to a broker or dealer for your securities transaction

Trading activity is generally limited to help minimize your trading costs. Trading may be required to meet initial allocation targets, after substantial cash deposits that require investment allocation, and/or after a request for a withdrawal that requires liquidation of a position. Additionally, your account may

be rebalanced or reallocated periodically in order to reestablish the targeted percentages of your initial asset allocation. This rebalancing or reallocation will occur on the schedule we have determined together. You will be responsible for any and all tax consequences resulting from any rebalancing or reallocation of the account. We are not tax professionals and do not give tax advice. However, we will work with your tax professionals to assist you with tax planning.

1. Financial Planning

We provide services such as comprehensive financial planning, estate planning, business planning and educational planning. Fee based financial planning is a comprehensive relationship which incorporates many different aspects of your financial status into an overall plan that meets your goals and objectives. The financial planning relationship consists of face to face meetings and ad hoc meetings with your other advisors (attorneys, accountants, etc.).

In performing financial planning services we typically examine and analyze your overall financial situation, which may include such issues as taxes, insurance needs, overall debt, credit, business planning, retirement savings and reviewing your current investment program. Our services may focus on all or only one of these areas depending upon the scope of our engagement with you.

You must agree to provide the information and documentation we request regarding your income, investments, taxes, insurance, estate plan, etc. You also must agree to discuss your investment objectives, needs and goals, and to keep us informed of any changes. We do not verify any information obtained from you, your attorney, accountant or other professionals.

If you engage us to perform these services, you will receive a written agreement detailing the services, fees, terms and conditions of the relationship. You will also receive this Brochure.

If the plan is implemented through us, we may receive compensation from the sale of services recommended in the plan. This compensation would be in addition to the financial planning fee you pay. The fees and expenses you pay for the purchase of these products may be more or less than the expenses you would pay should you decide to implement our recommendations through another investment advisory firm or broker-dealer and are typically determined by the broker-dealer or investment company sponsoring the product. Therefore, a conflict of interest may exist between our interests and your interests since we may recommend products that pay us compensation. We may have an incentive to recommend particular products based upon the potential compensation rather than your needs. However, you are under no obligation to implement our recommendations either through us or through another adviser. If you decide to implement the plan we create, you may do so through any broker-dealer or financial adviser of your choosing.

We obtain information from a wide variety of publicly available sources. We do not have any inside private information about any investments that are recommended. All recommendations developed by us are based upon our professional judgment. We cannot guarantee the results of any of our recommendations. You must decide what advice to follow.

2. Asset Management

Asset management is the professional management of securities (stocks, bonds and other securities) and assets (e.g., real estate) in order to meet your specified investment goals. With an Asset Management Account, you engage us to assist you in developing a personalized asset allocation program and custom-tailored portfolio designed to meet your unique investment objectives. The investments in the portfolio account may include mutual funds, stocks, bonds, equity options, futures, etc.

We will meet with you to discuss your financial circumstances, investment goals and objectives, and to determine your risk tolerance. We will ask you to provide statements summarizing current investments, income and other earnings, recent tax returns, retirement plan information, other assets and liabilities, wills and trusts, insurance policies, and other pertinent information. Based on the information you share with us, we will analyze your situation and recommend an appropriate asset allocation or investment strategy. You will be provided with a targeted strategic allocation of assets by class, as well as limited investment advice. Our recommendations and ongoing management is based upon your investment goals and objectives, risk tolerance, and the investment portfolio you have selected. We will monitor the account, trade as necessary, and communicate regularly with you. Your circumstances shall be monitored in quarterly and annual account reviews. These reviews will be conducted in person, by telephone conference, and/or via a written inquiry/questionnaire. We will work with you on an ongoing basis to evaluate your asset allocation as well as rebalance your portfolio to keep it in line with your goals as necessary. You will also receive our Advisory Agreement which describes what services you will receive and what fees you will be charged.

We will:

- Review your present financial situation
- Monitor and track assets under management
- Provide portfolio statements, periodic rate of return reports, asset allocation statement, rebalanced statements as needed
- Advise on asset selection
- Determine market divisions through asset allocation models
- Provide research and information on performance and fund management changes
- Build a risk management profile for you
- Assist you in setting and monitoring goals and objectives
- Provide personal consultations as necessary upon your request or as needed

You must notify us promptly when your financial situation, goals, objectives, or needs change.

You shall have the ability to impose reasonable restrictions on the management of your account, including the ability to instruct us not to purchase certain mutual funds, stocks or other securities. These restrictions may be a specific company security, industry sector, asset class, or any other restriction you request.

Under certain conditions, securities from outside accounts may be transferred into your advisory account; however, we may recommend that you sell any security if we believe that it is not suitable for the current recommended investment strategy. You are responsible for any taxable events in these instances. We do not provide tax advice or tax management services. You should always consult with your tax advisor for specific tax advice. Certain assumptions may be made with respect to interest and inflation rates and the use of past trends and performance of the market and economy. Past performance is not indicative of future results.

Your account can be managed in a tax aware manner; however, we do not provide tax advice or tax management services. Under these circumstances, you shall also have the ability to impose reasonable restrictions on the management of your account, including the ability to instruct us not to purchase certain mutual funds, stocks or other securities. These restrictions may be a specific company security, industry sector, asset class, or any other restriction you request.

If you decide to implement our recommendations, we will help you open a custodial account(s). The funds in your account will generally be held in a separate account, in your name, at an independent custodian, not with us. We recommend using Sterne-Agee. You will enter into a separate custodial agreement with the custodian. This agreement, among other things, authorizes the custodian to take instructions from us regarding all investment decisions for your account. The custodian will effect transactions, deliver securities, make payments and do what we instruct. You will at all times maintain full and complete ownership rights to all assets held in your account, including the right to withdraw securities or cash, proxy voting and receiving transaction confirmations.

You will receive, at least quarterly, a statement containing a description of all the activity in your account from the custodian. This statement lists the total value of the account at the start of the quarter, itemizes all transaction activity during the quarter, and lists the types, amounts, and total value of securities held as of the end of the quarter.

We will also provide you with a quarterly performance statement starting at the end of the first full calendar quarter after signing the Advisory Agreement. These statements give you additional feedback regarding performance, educate you about our long-term investment philosophy, and describe any changes in current strategy and allocation along with the reasons for making these changes.

Item 5 - Fees and Compensation

We provide asset management and financial planning services for a fee. Our fees do not include brokerage commissions, transaction fees, and other related costs and expenses. You may incur certain charges imposed by custodians, third party investment companies and other third parties. These include fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Mutual funds, money market funds and exchange traded funds also charge internal management fees, which are disclosed in the fund's prospectus. These fees may include, but are not limited to, a management fee, upfront sales charges, and other fund expenses. We do not

receive any compensation from these fees. All of these fees are in addition to the management fee you pay us. You should review all fees charged to fully understand the total amount of fees you will pay.

You could invest in a mutual fund directly, without our services. In that case, you would not receive the services provided by us which are designed, among other things, to assist you in determining which mutual fund or funds are most appropriate to your financial condition and objectives.

Our Advisory Agreement defines what fees are charged and their frequency. We usually bill fees in arrears on a quarterly basis. You will authorize the custodian to directly debit fees from your account held at the custodian and to pay us. Management fees are prorated for each contribution and withdrawal made during the applicable calendar quarter (with the exception of small inconsequential contributions and withdrawals). You will be provided with a quarterly statement reflecting deduction of the advisory fees.

Either party may terminate the initial agreement at any time by providing thirty (30) days written notice to the other party. You will incur charges for advisory or financial planning services rendered up to the point of termination and such fees will be due and payable by you within five business days of being billed.

1. Financial Planning Fees

You may want us to provide financial planning services to you. We can provide analysis and recommendations for any or all of your financial needs. Fees are calculated based upon our evaluation of the complexity and nature of your situation; your fee is stipulated in your investment advisory agreement with us. Fees range from \$250 to \$10,000; however, all fees are negotiable.

The Advisory Agreement will show the fee schedule you will pay. A deposit of 50% of the fee is due at the time the agreement is signed. The remainder of the fees is due upon presentation of a plan or the rendering of services. Plans will be presented to you within six months of the contract date, provided that all information needed to prepare the plan has been promptly provided to us.

If the plan is implemented through us, we may receive compensation from the sale of services recommended in the plan. This compensation would be in addition to the financial planning fee you pay. The fees and expenses you pay for the purchase of these products may be more or less than the expenses you would pay should you decide to implement our recommendations through another investment advisory firm or broker-dealer and are typically determined by the broker-dealer or investment company sponsoring the product. Therefore, a conflict of interest may exist between our interests and your interests since we may recommend products that pay us compensation. We may have an incentive to recommend particular products based upon the potential compensation rather than your needs. This potential conflict is addressed in our Code of Ethics.

All recommendations developed by us are based upon our professional judgment. We cannot guarantee the results of any of our recommendations. You must decide what advice to follow.

2. Asset Management Fee Schedule

We do not have a minimum account opening balance; however some individual investments may have minimum requirements. We do charge a one-time document and account setup fee of \$375 for accounts opened with less than \$100,000; we also apply a \$100 non-refundable transfer and closure fee, as applicable. The asset management fee charged is based upon the amount of money you invest. Multiple accounts of immediately-related family members, at the same mailing address, may be considered one consolidated account for billing purposes. You will pay fees quarterly, in arrears according to our agreement with you. Payments are due and will be assessed on the last day of each quarter, based on the ending balance of the account under management for the preceding quarter and be calculated as follows:

Percentage	Portfolio Size (AUM)
1.375%	On the first \$1,500,000
0.55%	On the next \$1,500,000 to \$10,000,000
0.45%	On amounts in excess of \$10,000,000

This fee is an annual fee; you will be billed one quarter of this amount on a quarterly basis. No increase in the annual fee shall be effective without prior written notification to you. We believe our advisory fee is reasonable considering the fees charged by other investment advisers offering similar services/programs however lower fees for comparable services may be available from other advisors

Our fees will not be based upon a share of capital gains or capital appreciation of the funds or any portion of your funds. In no event shall we charge advisory fees that are both in excess of \$500 and more than six months in advance of advisory services rendered.

Certain strategies offered by us may involve investment in mutual funds. Load and no load mutual funds may pay annual distribution charges, sometimes referred to as "12(b) (1) fees". These 12(b) (1) fees come from fund assets, and thus indirectly clients' assets. We may receive compensation from these fees. The 12(b) (1) fee, deferred sales charges and other fee arrangements will be disclosed upon your request and are typically described in the applicable fund's prospectus.

Your account at the custodian may also be charged for certain additional assets managed for you by us but not held by the Custodian (i.e. mutual funds).

Item 6 - Performance Based Fee and Side by Side Management

We do not charge any performance-based fees. These are fees based on a share of capital gains on or capital appreciation of the assets of a client. We do not do side-by side management.

Item 7 - Types of Client(s)

We provide portfolio management services to individuals, high net worth individuals and state and teacher pension plans.

Item 8 - Methods of Analysis, Investment Strategies and Risk of Loss

We use Fundamental, Technical and Cyclical Analyses as well as Modern Portfolio Theory as part of our overall investment management discipline; the implementation of these analyses as part of our investment advisory services to you may include any, all or a combination of the following:

1. Fundamental Analysis

Fundamental analysis is a technique that attempts to determine a security's value by focusing on the underlying factors that affect a company's actual business and its future prospects. Fundamental analysis is about using real data to evaluate a security's value. It refers to the analysis of the economic well-being of a financial entity as opposed to only its price movements.

Fundamental analysis serves to answer questions, such as:

- Is the company's revenue growing?
- Is it actually making a profit?
- Is it in a strong-enough position to beat out its competitors in the future?
- Is it able to repay its debts?

One of the primary assumptions of fundamental analysis is that the price on the market does not fully reflect an investment's "real" value. We use a combination of qualitative and quantitative factors to try and find investments that are undervalued. We look at both macroeconomic factors such as the overall economy and industry conditions and company-specific factors such as financial condition and management. When we are examining an investment, we might look at the investment's annual dividend payout, earnings per share, Price to Earnings ratio and many other quantitative factors. However, no analysis is complete without taking into account brand recognition and other qualitative factors.

The end goal of performing fundamental analysis is to produce a value that we can compare with the investment's current price, with the aim of figuring out what sort of position to take with that security (underpriced = buy, overpriced = sell).

In order to perform this fundamental analysis, we use many resources, such as:

- Morningstar
- Financial newspapers and magazines (e.g. Wall Street Journal, Forbes, etc.)

- Annual reports, prospectuses, filings with the Securities and Exchange Commission
- Research materials prepared by others
- Company press releases
- Corporate rating services
- Company websites

The investment strategies we use to implement any investment advice given to you include, but are not limited to long term purchases (securities held at least a year).

Once we discover undervalued investments, we look at the companies and entities offering these investments to determine stability and volatility of the investments.

2. Modern Portfolio Theory (MPT)

We use publically available research and reports regarding individual securities, issuers, investment strategies and performance of asset classes to select the funds they will offer. They also use Modern Portfolio Theory to help them select the funds they offer. Modern Portfolio Theory was created by some of the world's leading academic economist. They conducted extensive research, demonstrating that asset class selection (such as small-cap vs. large-cap, value vs. growth and U.S. vs. international)-not stock selection or market timing-is the most important determinant of portfolio performance.

Modern portfolio theory tries to understand the market as a whole, rather than looking for what makes each investment opportunity unique. Investments are described statistically, in terms of their expected long-term return rate and their expected short-term volatility. The volatility is equated with "risk", measuring how much worse than average an investment's bad years are likely to be. The end goal is to identify your acceptable level of risk tolerance, and then to find a portfolio with the maximum expected return for that level of risk.

3. Technical Analysis

Technical Analysis is a technique that attempts to determine a security's value by developing models and trading rules based upon price and volume transformation. Technical analysis assumes that a market's price reflects all relevant information so the analysis focuses on the history of a security's trading behavior rather than external drivers such as economic, fundamental and news events. The practice of technical analysis incorporates the importance of understanding how market participants perceive and act upon relevant information rather than focusing on the information itself. Ultimately, technical analysts develop trading models and rules by evaluating factors such as market trends, market participant behaviors, supply and demand and pricing patterns and correlations.

In order to perform technical analysis, we use the following techniques:

- Calculate moving averages
- Stochastic oscillators, which incorporate support and resistance levels to determine momentum.
- Charting and chart patterns
- Supply and demand indicators
- Investor behavior and psychology

The investment strategies we use to implement any investment advice given to you include, but are not limited to long-term purchases (securities held at least a year).

As with other types of analysis, the predictive nature of technical analysis can vary greatly; models and rules are often modified and updated as new patterns and behaviors develop. Past performance is not an indicator of future return.

4. Cyclical Analysis

While we do not attempt to time the market, we may use cyclical analysis in conjunction with other strategies to help determine if shifts are required in your investment strategies depending upon long and short-term trends in financial markets and the performance of the overall national and global economy.

5. Risks

We cannot guarantee our analysis methods will yield a return. In fact, a loss of principle is always a risk. Investing in securities involves a risk of loss that you should be prepared to handle. You need to understand that investment decisions made for your account by us are subject to various market, currency, economics, political and business risks. The investment decisions we make for you will not always be profitable nor can we guarantee any level of performance. For a more comprehensive description of all the risks associated with our strategies, methodology, and products please refer to the glossary under Risks.

Item 9 - Disciplinary Information

Registered Investment Advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of us or the integrity of our management. Amerivet the Registered Investment Advisor has no disclosures to report. However, Elton Johnson was party to a discloseable event through Amerivet Securities, Inc., a broker-dealer. The disclosure event for Elton Johnson is as follows:

- On September 28, 2006, the NASD alleged that Elton failed to supervise a registered representative in 1996 who was working for several other companies selling what were deemed to have been non-securities in 1996 and were later deemed to be securities in 2003. Elton denies these allegations however, the NASD received a judgment against him and he was suspended for eighteen months as a registered principal and FinOp. Elton was unable to attend the hearing since he had been deployed for active duty in the military.

Item 10 - Other Financial Industry Activities and Affiliations

Amerivet Securities, Inc. is a registered broker-dealer whose representatives are licensed to offer securities in California; Elton Johnson, Jr., and Michael Sanchez are licensed to offer securities through

Amerivet Securities, Inc. Amerivet Securities, Inc. is a financial services company registered with the Financial Industry Regulatory Authority (“FINRA”) as a broker-dealer engaged in the offer and sale of securities products. Registered Representatives may recommend the purchase of securities offered by Amerivet Securities, Inc. If you purchase these products through these registered representatives, they will receive normal commissions which may be in addition to customary advisory fees. As such, Amerivet Securities, Inc. registered representatives may have an incentive to sell you commissionable products in addition to providing you with advisory services when such commissionable products may not be suitable. Alternatively, they may have an incentive to forego providing you with advisory services when appropriate and instead recommend the purchase of commissionable investments, if they deem that the payout for recommending the purchase of these investments would be higher than providing management advice on these products for an advisory fee. Therefore, a conflict of interest may exist between their interests and your best interests.

While Amerivet’s security sales are reviewed for suitability by an appointed supervisor, you should be aware of the incentives we have to sell certain securities products and are encouraged to ask us about any conflict presented. Our Code of Ethics prohibits our advisers from doing anything that is not in your best interests. We have procedures in place to monitor for prohibited activities.

Please be aware that you are under no obligation to purchase products or services recommended by us or members of our Firm in connection with providing you with any advisory service that we offer.

Elton Johnson Jr.

Elton is President and CEO of Amerivet Securities, Inc. which is a broker-dealer. Elton’s role accounts for 40 hours per month of his time.

Michael Sanchez

Michael is a registered representative of Amerivet Securities, Inc. His role accounts for 40 hours per week of his time.

Item 11 - Code of Ethics, Participation in Client Transactions and Personal Trading

1. General Information

We have adopted a Code of Ethics for all supervised persons of the firm describing its high standards of business conduct, and fiduciary duty to you, our client. The Code of Ethics includes provisions relating to the confidentiality of client information, a prohibition on insider trading, a prohibition of rumor mongering, restrictions on the acceptance of significant gifts, the reporting of certain gifts and business entertainment items, and personal securities trading procedures. All of our supervised persons must acknowledge the terms of the Code of Ethics annually, or as amended.

We may recommend securities to you that we have purchased for our own accounts. We may trade securities in our account that we have recommended to you as long as we place our orders after your

orders. This policy is meant to prevent us from benefiting as a result of transactions placed on behalf of advisory accounts.

We have established the following restrictions in order to ensure our fiduciary responsibilities to you are met:

- We shall not buy or sell securities for our personal portfolio(s) where this decision is substantially derived, in whole or in part, from our role as an Investment Advisory Representative of Amerivet, unless the information is also available to the investing public on reasonable inquiry. In no case, shall we put our own interests ahead of yours.
- We emphasize your unrestricted right to decline to implement any advice rendered.

However, some securities trade in sufficiently broad markets to permit transactions by clients to be completed without an appreciable impact on the markets of the securities. Under certain circumstances, exceptions may be made to the policies stated above. Records of these trades, including the reasons for the exceptions, will be maintained with our records as required.

In addition, open-end mutual funds and/or investment sub-accounts which may comprise a variable insurance product are purchased or redeemed at a fixed net asset value. Therefore, purchases of mutual funds and/or variable insurance products by an advisor are not likely to have an impact on the prices of the fund in which you invest. These types of transactions are not prohibited by our policies and procedures.

Certain affiliated accounts may trade in the same securities with your accounts on an aggregated basis when consistent with our obligation of best execution. When trades are aggregated, all parties will share the costs in proportion to their investment. We will retain records of the trade order (specifying each participating account) and its allocation. Completed orders will be allocated as specified in the initial trade order. Partially filled orders will be allocated on a pro rata basis. Any exceptions will be explained on the Order.

You may request a copy of the firm's Code of Ethics by contacting Elton Johnson, Jr.

2. Responsibility

It is the responsibility of all supervisory personnel to ensure that we conduct business with the highest level of ethical standards and in keeping with our fiduciary duties to you. We must put your interests first and refrain from having outside interests that conflict with your interests.

3. Privacy Statement

We are committed to safeguarding your confidential information and hold all personal information provided to it in the strictest confidence. These records include all personal information that we collect from you or receive from other firms in connection with any of the financial services they provide. We also require other firms with whom we deal with to restrict the use of your information. Our Privacy Policy is available upon request.

4. Prohibited Acts

The following acts are prohibited:

- Employing any device, scheme or artifice to defraud
- Making any untrue statement of a material fact
- Omitting to state a material fact necessary in order to make a statement, in light of the circumstances under which it is made, not misleading
- Engaging in any fraudulent or deceitful act, practice or course of business
- Engaging in any manipulative practices
- Participating in Client accounts

5. Conflicts of Interest

We have a duty to disclose potential and actual conflicts of interest. We have a duty to report potential and actual conflicts of interest to management. Gifts (other than de minimis gifts, which are usually defined as having a value under \$100.00) should not be accepted from persons or entities doing business with us.

Performance based fee arrangements may create an incentive for us to recommend investments which may be riskier or more speculative than those which would be recommended under a different fee arrangement. Such fee arrangements also create an incentive to favor higher fee paying accounts over other accounts. We have procedures to help ensure that you are treated fairly and equally, and to prevent this conflict from influencing the allocation of investment opportunities among clients.

Our advisors employ the same strategy for their personal investment accounts as they do for their clients. However, they do not place their orders in a way to benefit from the purchase or sale of a security.

We act in a fiduciary capacity. If a conflict of interest arises between us and you, we shall make every effort to resolve the conflict in your favor. Conflicts of interest may also arise in the allocation of investment opportunities among the accounts that we advise. We will seek to allocate investment opportunities according to what we believe is appropriate for each account. We strive to do what is equitable and in the best interest of all the accounts we advise.

All material conflicts of interest under CCR Section 260.238 (k) are disclosed regarding the investment adviser, its representatives or any of its employees, which could be reasonably expected to impair the rendering of unbiased and objective advice.

6. Use of Disclaimers

We shall not attempt to limit liability for willful misconduct or gross negligence through the use of disclaimers.

7. Suitability

We shall only recommend those investments that we believe are suitable for you based upon your particular situation and circumstances. In addition, you must notify us of any significant changes in your situation or circumstances so that we can respond appropriately.

Item 12 - Brokerage Practices

1. Soft Dollars

We do not receive any soft dollars from broker-dealers, custodians or third party money managers.

2. Brokerage for Client Referrals

We do not receive any compensation or incentive for referring you to broker-dealers for brokerage trades.

3. Directed Brokerage

Not all advisory firms require you to direct brokerage to a specific broker/dealer. We may allow clients to direct brokerage to firms they have a relationship with and request us to use. However, we have an obligation to seek best execution for you. You may pay higher or lower fees if you select another broker-dealer. Generally, we will not negotiate lower rates below the rates established by the executing broker-dealer for this type of directed brokerage account, unless we believe that such rate is unfair or unreasonable for the size and type of transaction. We may not be able to obtain best execution if the client directs brokerage to another broker-dealer.

In seeking best execution, the determinative factor is not the lowest possible commission cost but whether the transaction represents the best qualitative execution, taking into consideration the full range of a Broker-Dealer's services including the value of research provided, execution capability, commission rates, and responsiveness. Therefore, we will seek competitive commission rates, but we may not obtain the lowest possible commission rates for account transactions.

By directing brokerage to Amerivet Securities, Inc. you may pay higher fees or transaction costs than those obtainable by other broker-dealers. In most cases, we believe you are paying a discounted and reasonable rate. We believe that we pay industry standard commissions on transactions handled for our investment advisory clients.

Item 13 - Review of Accounts

1. Duty to Supervise

We are responsible for ensuring adequate supervision over the activities of all persons who act on our behalf. Specific duties include:

- Establish procedures that could be reasonably expected to prevent and detect violations of law by our Advisory personnel
- Analyze operations and create a system of controls to ensure compliance with applicable securities laws
- Ensure that all Advisory personnel fully understand the Company's policies and procedures

- Establish a review system designed to provide reasonable assurance that our policies and procedures are effective and being followed

2. Reviews

Reviews will be conducted by Elton Johnson the CEO at least annually or as agreed to by us. You may request more frequent reviews and may set thresholds for triggering events that would cause a review to take place. Generally, we will monitor for changes and shifts in the economy, changes to the management and structure of a mutual fund or company in which client assets are invested, and market shifts and corrections. You are should notify us promptly of any changes to your financial goals, objectives or financial situation as such changes may require us to review your portfolio and make recommendations for changes.

3. Reports

You will be provided with account statements reflecting the transactions occurring in the account on at least a quarterly basis. You will be provided with confirmations for each securities transaction executed in the account. Please notify us of any discrepancies in the account or any concerns you have about the account.

Item 14 - Client Referrals and Other Compensation

We do not receive any compensation for referring clients to another advisor nor do we pay any compensation to another advisor for them referring clients to us.

Item 15 - Custody

We do not have physical custody of any accounts or assets. However, we may be deemed to have custody of your accounts if we have the ability to deduct your quarterly fees from the custodian. We can use a variety of custodians and/or broker-dealers for all your accounts. You should receive at least quarterly statements from the broker-dealer or custodian that holds and maintains your investment assets. We urge you to carefully review such statements and compare this official custodial record to the account statements that we may provide to you. Our statements may vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities. If you notice any discrepancies, please contact Elton Johnson, Jr.

We do not debit the client fees directly from your advisory account. Only the custodian has the authority to directly charge and debit the advisory to your account, which is then paid to us. The Custodian will provide you immediate transaction confirmations and statements. Statements list the total value of the account at the start and end of the time period and itemize all transactions and security positions. For taxable accounts, the Custodian will provide you consolidated year-end summary statements including IRS forms 1099 and other tax-related forms, as applicable. We are not allowed to

make alterations or amendments to the custodian's statement. This preserves the integrity of the Custodian's statement and provides you with an independent appraisal of the account.

Item 16- Investment Discretion

We do not receive discretionary authority from you to select the type of securities and amount of securities to be bought or sold. We usually only have the ability to rebalance and reallocate your accounts on a periodic basis, with your permission.

Item 17- Voting Client Securities

As a matter of firm policy and practice, we do not have any authority to and do not vote proxies on behalf of advisory clients. You retain the responsibility for receiving and voting proxies for any and all securities maintained in your portfolios. We may provide advice to you regarding your voting of proxies. We are authorized to instruct the Custodian to forward you copies of all proxies and shareholder communications relating to your account assets.

Item 18 - Financial Information

We are required to provide you with certain financial information or disclosures about our financial condition. We have no financial commitment that would impair our ability to meet any contractual and fiduciary commitments to you, our client. We have not been the subject of any bankruptcy proceedings. We do not solicit or require prepayment of fees that are more than \$500 per client and six months or more in advance of services.

Item 19 - Requirements for State Registered Advisers

There are is one principal of Amerivet Securities, Inc, Elton Johnson, Jr. ("Elton"). There is one other investment adviser Michal Sanchez ("Michael") and three officers at Amerivet, they are: Neil Patrick White ("Neil"), Dexter Tran ("Dexter"), and John Bates ("John"). The Principal and investment adviser information is as follows:

Principals

Elton Johnson, Jr.

Educational Background and Business Experience

Education

Master of Business Administration (Candidate)

American Military University, Charles Town, West Virginia

Brochure Supplement (Part 2B of Form ADV) Elton Johnson, Jr.

Item 1 – Cover Page

Elton Johnson, Jr.

Amerivet Securities, Inc.
26550 Silverado Court
Moreno Valley, CA 92555
(951) 242-8090

This brochure supplement provides information about Elton Johnson, Jr. and supplements the Amerivet Securities, Inc. brochure. You should have received a copy of that brochure. Please contact him if you did not receive Amerivet Securities, Inc.'s brochure or if you have any questions about the contents of this supplement.

Elton Johnson, Jr. is not currently registered to offer investment advisory services; should he become registered, additional information about him will be available on the SEC's website at www.adviserinfo.sec.gov.

Elton Johnson, Jr. (“Elton”) is a principal of Amerivet Securities, Inc. and serves as the President and CEO. He was born in 1953. His information is as follows:

Item 2 – Educational Background and Business Experience

Education

Master of Business Administration (Candidate)

American Military University, Charles Town, West Virginia

Bachelor of Business Administration in Finance, 1976

University of Notre Dame, South Bend, Indiana

Business History

August 1993 – Present

Founder, President, CEO and COO at Amerivet

Item 3 - Disciplinary Information

Elton has no regulatory history to disclose regarding this Registered Investment Adviser. Elton has the following disciplinary history to disclose as it relates to Amerivet Securities, Inc., the broker-dealer: On September 28, 2006, the NASD alleged that Elton failed to supervise a registered representative in 1996 who was working for several other companies selling what were deemed to have been non-securities in 1996 and were later deemed to be securities in 2003. Elton denies these allegations however, the NASD received a judgment against him and he was suspended for eighteen months as a registered principal and FinOp. Elton was unable to attend the hearing since he had been deployed for active duty in the military.

Item 4 - Other Business Activities

Elton is a registered representative of Amerivet Securities, Inc. and is licensed to offer securities. Elton’s role accounts 40 hours per month of his time. Elton is also on active duty with the military.

Item 5 – Additional Compensation

Elton will receive compensation from the sale of securities.

Item 6 – Supervision

Elton is the majority owner and performs all supervisory duties for Amerivet Securities, Inc.

Item 7 – Requirements for State-Registered Advisers

All reportable events were disclosed in Item 3 above. There are no additional disclosures.

Specialty

Elton specializes in developing and implementing investment portfolios and strategies and providing consulting for individuals and state and teacher pension plans. Elton is an advocate for veterans’ rights and Amerivet is a designated California Disabled Veteran Business Enterprise. Each aspect of the investment management and consulting process is tailored to the unique needs of his clients.

Item 1 – Cover Page

Michael Sanchez

**Amerivet Securities, Inc.
26550 Silverado Court
Moreno Valley, CA 92555
(951) 242-8090**

This brochure supplement provides information about Michael Sanchez and supplements the Amerivet Securities, Inc. brochure. You should have received a copy of that brochure. Please contact Elton Johnson, Jr. if you did not receive Amerivet Securities, Inc.'s brochure or if you have any questions about the contents of this supplement.

Michael Sanchez is not currently registered to offer investment advisory services; should he become registered, additional information about him will be available on the SEC's website at www.adviserinfo.sec.gov.

Michael Sanchez (“Michael”) is a principal of Amerivet Securities, Inc. and serves as a registered representative with Amerivet’s broker-dealer. He was born in 1961. Michael does not currently offer investment advice to any Amerivet clients in California. His information is as follows:

Item 2 – Educational Background and Business Experience

Education

Bachelor of Arts
USC, CA

Business History

October 2009 – Present	Director of Business Development at Byrn & Clayton Consulting, LLC
March 2009 – Present	Principal and Registered Representative at Amerivet
January 2009 – August 2009	CCO at Vaquero Private Capital, Inc
June 2007 – January 2009	Compliance Officer at Glencrest Investment Advisors, Inc.
March 2007 – June 2007	Unemployed
March 2005 – March 2007	Compliance Officer at Morgan Stanley
September 2001 – March 2005	Compliance Officer at State Street Global Markets, LLC
October 1998 – September 2001	CCO at Bel Air Securities LLC

Item 3 - Disciplinary Information

Michael does not have any disciplinary history to disclose.

Item 4 - Other Business Activities

Michael is a registered representative of Amerivet Securities, Inc. and is licensed to offer securities only in California. Michael is also on the Board of Trustees for the Holy Name of Mary School Endowment Trust Fund. He spends about two hours per month on this activity.

Item 5 – Additional Compensation

Michael will receive compensation from the sale of securities.

Item 6 – Supervision

In his role at Amerivet, Michael will be supervised by Elton Johnson, Jr.

Item 7 – Requirements for State-Registered Advisers

Michael has no reportable events to disclose here.

Glossary of Key Terms

Adviser – Amerivet

Advisor – Your individual representative at Amerivet

Asset Allocation – The process of dividing investments among different kinds of assets, such as stocks, bonds, real estate and cash, to optimize the risk/reward tradeoff based on an individual's or institutions specific situation and goals; a key concept in financial planning and money management.

Asset-class investment portfolios – An asset class is a grouping of similar investments whose prices tend to move together. Asset classes can be defined on a very general level, such as stocks or on a more specific level, such as American silver producing companies. The concept of asset classes is important because one of the goals when building an investment portfolio is to use different asset classes which are not correlated with each other.

Diversification – a portfolio strategy designed to reduce exposure to risk by combining a variety of investments, such as stocks, bonds, and real estate, which are unlikely to all move in the same direction. The goal of diversification is to reduce the risk in a portfolio. Volatility is limited by the fact that not all asset classes or industries or individual companies move up and down in value at the same time or at the same rate. Diversification reduces both the upside and downside potential and allows for more consistent performance under a wide range of economic conditions.

Exchange-Traded Funds (ETFs) – A type of an investment company (either an open-end company or UIT) whose objective is to achieve the same return as a particular market index. ETFs differ from traditional open-end companies and UITs, because, pursuant to SEC exemptive orders, shares issued by ETFs trade on a secondary market and are only redeemable from the fund itself in very large blocks (blocks of 50,000 shares for example).

Expense Ratio – the fund's total annual operating expenses (including management fees, distribution (12b-1) fees, and other expenses) expressed as a percentage of average net assets.

Fees– a list of all fees associated with different products we offer are listed below:

1. **12b-1 Fees** – Fees paid by the fund out of fund assets to cover the costs of marketing and selling fund shares and sometimes to cover the costs of providing shareholder services. "Distribution fees" include fees to compensate brokers and others who sell fund shares and to pay for advertising, the printing and mailing of prospectuses to new investors, and the printing and mailing of sales literature. "Shareholder Service Fees" are fees paid to persons to respond to investor inquiries and provide investors with information about their investments.
2. **Account Fee**— A fee that some funds separately impose on investors for the maintenance of their accounts. For example, accounts below a specified dollar amount may have to pay an account fee.
3. **Distribution Fees** – Fees paid out of fund assets to cover expenses for marketing and selling fund shares, including advertising costs, compensation for brokers and others who sell fund

shares, and payments for printing and mailing prospectuses to new investors and sales literature prospective investors. Sometimes referred to as "12b-1 fees."

4. **Management Fee** — fee paid out of fund assets to the fund's investment adviser or its affiliates for managing the fund's portfolio, any other management fee payable to the fund's investment adviser or its affiliates, and any administrative fee payable to the investment adviser that are not included in the "Other Expenses" category. A fund's management fee appears as a category under "Annual Fund Operating Expenses" in the Fee Table.
5. **Operating Expenses** — the costs a fund incurs in connection with running the fund, including management fees, distribution (12b-1) fees, and other expenses.
6. **Purchase Fee** — a shareholder fee that some funds charge when investors purchase mutual fund shares. Not the same as (and may be in addition to) a front-end load.
7. **Redemption Fee** — a shareholder fee that some funds charge when investors redeem (or sell) mutual fund shares. Redemption fees (which must be paid to the fund) are not the same as (and may be in addition to) a back-end load (which is typically paid to a broker). The SEC generally limits redemption fees to 2%.
8. **Sales Charge (or "Load")** — the amount that investors pay when they purchase (front-end load) or redeem (back-end load) shares in a mutual fund, similar to a commission. The SEC's rules do not limit the size of sales load a fund may charge, but FINRA rules state that mutual fund sales loads cannot exceed 8.5% and must be even lower depending on other fees and charges assessed.
9. **Shareholder Service Fees** — fees paid to persons to respond to investor inquiries and provide investors with information about their investments. See also "12b-1 fees."

Index Fund — describes a type of mutual fund or Unit Investment Trust (UIT) whose investment objective typically is to achieve the same return as a particular market index, such as the S&P 500 Composite Stock Price Index, the Russell 2000 Index, or the Wilshire 5000 Total Market Index.

Investment Adviser — generally, a person or entity who receives compensation for giving individually tailored advice to a specific person on investing in stocks, bonds, or mutual funds. Some investment advisers also manage portfolios of securities, including mutual funds.

Investment Company — a company (corporation, business trust, partnership, or limited liability company) that issues securities and is primarily engaged in the business of investing in securities. The three basic types of investment companies are mutual funds, closed-end funds, and unit investment trusts (UITs).

Investment Goals — objective or target, usually driven by specific future financial needs. Some common goals for an individual are: saving for a comfortable retirement, saving to send children to college, managing finances to enable a home purchase, minimizing taxes, and maximizing return on investments given a certain risk tolerance, and estate or trust planning.

Investment Objectives — The financial goal or goals of an investor. An investor may wish to maximize current income, maximize capital gains, or set a middle course of current income with some

appreciation of capital. Defining investment objectives helps to determine the investments an individual should select.

Margin — borrowing money (usually using securities you already own as collateral) that is used to purchase securities

Mutual Fund — the common name for an open-end investment company. Like other types of investment companies, mutual funds pool money from many investors and invest the money in stocks, bonds, short-term money-market instruments, or other securities. Mutual funds issue redeemable shares that investors purchase directly from the fund (or through a broker for the fund) instead of purchasing from investors on a secondary market.

NAV (Net Asset Value) — the value of the fund's assets minus its liabilities. SEC rules require funds to calculate the NAV at least once daily. To calculate the NAV per share, simply subtract the fund's liabilities from its assets and then divide the result by the number of shares outstanding.

No-load Fund — a fund that does not charge any type of sales load. Not every type of shareholder fee is a "sales load," and a no-load fund may charge fees that are not sales loads. No-load funds also charge operating expenses.

Open-End Company — the legal name for a mutual fund. An open-end company is a type of Investment Company that continuously offers new shares for sale.

Option Contracts—Options are a type of derivative; derivatives are securities whose prices are derived from the price of an underlying asset or group of assets. The most common underlying assets are equities, debt, commodities and currencies; option contracts also exist for indices and interest rates. Options consist of a type (call or put), a strike price (the price at which the underlying asset is delivered), a premium (the price a buyer pays the seller for the option contract) and an expiration date. Options come in two types:

- **Calls:** Calls provide buyers, also known as holders, the right (but not the obligation) to purchase a specified amount of the underlying asset from the Seller. Calls obligate sellers, also known as writers, to sell a specified amount of the underlying asset to the buyer at the strike price.
- **Puts:** Puts provide buyers, also known as holders, the right (but not the obligation) to sell a specified amount of the underlying asset to Seller. Puts obligate sellers, also known as writers, to buy a specified amount of the underlying asset from the buyer at the strike price.

For each type of option, the buyer may exercise his or her right prior to or at expiration. For stock options, the amount covered by the option is usually 100 shares. If the stock option contract is exercised, the writer is responsible for fulfilling the terms of the contract by delivering the shares to the holder. In the case of a security that cannot be delivered such as an index, the contract is settled in cash. For the holder, the potential loss is limited to the price paid to acquire the option. When an option is not exercised, it expires. No shares change hands and the money spent to purchase the option is lost. For the buyer, the upside is unlimited. Option contracts, like stocks, are therefore said to have an asymmetrical payoff pattern. For the writer, the potential loss is unlimited for uncovered calls and

limited to the strike price less the premium received for uncovered puts. For the option writer, gains are limited to the payment received for the options. Option writers can also write covered options, meaning that the writer already owns or has sold the security underlying the option. Option contracts are most frequently utilized to increase leverage or provide downside protection on an underlying asset. As leverage, options allow the holder to control equity in a limited capacity for a fraction of what the shares would cost. The difference can be invested elsewhere until the option is exercised. As protection, options can guard against price fluctuations in the near term because they provide the right to acquire the underlying stock at a fixed price for a limited time. Risk is limited to the option premium (except when writing options for a security that is not already owned). However, the costs of trading options (including both commissions and the bid/ask spread) are higher on a percentage basis than trading the underlying stock. Options are also a wasting asset, meaning that their value eventually declines to zero if not exercised. In addition, options are very complex and require a great deal of observation and maintenance. Some types of option strategies involving multiple option contracts have unknown risks because the price movements between the different option contracts are not well understood.

Portfolio — an individual's or entity's combined holdings of stocks, bonds, or other securities and assets.

Profile — summarizes key information about a mutual fund's costs, investment objectives, risks, and performance. Although every mutual fund has a prospectus, not every mutual fund has a profile.

Prospectus — describes the mutual fund to prospective investors. Every mutual fund has a prospectus. The prospectus contains information about the mutual fund's costs, investment objectives, risks, and performance. You can get a prospectus from the mutual fund company (through its website or by phone or mail). Your financial professional or broker can also provide you with a copy.

Risks — a list of all risks associated with the strategies, products and methodology we offer are listed below:

1. Alternative Investment Risk

Investing in alternative investments is speculative, not suitable for all clients, and intended for experienced and sophisticated investors who are willing to bear the high economic risks of the investment, which can include:

- Loss of all or a substantial portion of the investment due to leveraging, short-selling or other speculative investment practices
- Lack of liquidity in that there may be no secondary market for the fund and none expected to develop
- Volatility of returns
- Restrictions on transferring interests in the fund
- Absence of information regarding valuations and pricing
- Delays in tax reporting
- Less regulation and higher fees than mutual funds

2. Bond Fund Risk

Bond funds generally have higher risks than money market funds, largely because they typically pursue strategies aimed at producing higher yields of the risks associated with bond funds include:

- Call Risk - The possibility that falling interest rates will cause a bond issuer to redeem—or call—its high-yielding bond before the bond's maturity date.
- Credit Risk — the possibility that companies or other issuers whose bonds are owned by the fund may fail to pay their debts (including the debt owed to holders of their bonds). Credit risk is less of a factor for bond funds that invest in insured bonds or U.S. Treasury bonds. By contrast, those that invest in the bonds of companies with poor credit ratings generally will be subject to higher risk.
- Interest Rate Risk — the risk that the market value of the bonds will go down when interest rates go up. Because of this, you can lose money in any bond fund, including those that invest only in insured bonds or Treasury bonds.
- Prepayment Risk — the chance that a bond will be paid off early. For example, if interest rates fall, a bond issuer may decide to pay off (or "retire") its debt and issue new bonds that pay a lower rate. When this happens, the fund may not be able to reinvest the proceeds in an investment with as high a return or yield.

3. Fundamental Analysis Risk

Fundamental analysis, when used in isolation, has a number of risks:

- There are an infinite number of factors that can affect the earnings of a company, and its stock price, over time. These can include economic, political and social factors, in addition to the various company statistics.
- When using this method with mutual funds, the funds are composed of many companies and not all of them will be undervalued
- The data used may be at least six months out of date.
- It is difficult to give appropriate weightings to the factors.
- In the early 1970s and 1980s price/earnings multiples of 80 or 90 were considered acceptable by some for 'blue chip' stocks in the United States.
- In the 1980s in the United States some biotechnology stocks sold at '50 times sales'. The companies had no earnings and paid no dividend. The new yardstick to value these became 'products in the pipeline'. By the late 1980s most had lost three-quarters of their stock price.
- It assumes that the analyst is competent.
- A fundamental analyst assumes that other fundamental analysts will form the same view about the company and buy the stock, thus restoring its value and returning the trader or investor a capital gain. In practice, an undervalued company's stock price can stay at approximately the same level (or decline) for years.
- It ignores the influence of random events such as oil spills, product defects being exposed, and acts of God and so on.

- It assumes that there is no monopolistic power over markets.
- Even when fundamental analysis reveals an undervalued company, or a stock with high growth prospects, it does not tell us anything about the timing of the purchase of the stock. In other words, we may have discovered a grossly undervalued stock whose price has been falling for some time, and may well continue falling.

4. Insurance Product Risk

The rate of return on variable insurance products is not stable, but varies with the stock, bond and money market subaccounts that you choose as investment options. There is no guarantee that you will earn any return on your investment and there is a risk that you will lose money. Before you consider purchasing a variable product, make sure you fully understand all of its terms. Carefully read the prospectus. Some of the major risks include:

- Liquidity and Early Withdrawal Risk – There may be a surrender charges for withdrawals within a specified period, which can be as long as six to eight years. Any withdrawals before a client reaches the age of 59 ½ are generally subject to a 10 percent income tax penalty in addition to any gain being taxed as ordinary income.
- Sales and Surrender Charges – Asset-based sales charges or surrender charges. These charges normally decline and eventually are eliminated the longer you hold your shares. For example, a surrender charge could start at 7 percent in the first year and decline by 1 percent per year until it reaches zero.
- Fees and Expenses – There are a variety of fees and expenses which can reach 2% and more such as:
 - Mortality and expense risk charges
 - Administrative fees
 - Underlying fund expenses
 - Charges for any special features or riders
- Bonus Credits – Some products offer bonus credits that can add a specified percentage to the amount invested ranging from 1 percent to 5 percent for each premium payment. Bonus credits, however, are usually not free. In order to fund them, insurance companies typically impose high mortality and expense charges and lengthy surrender charge periods.
- Guarantees – Insurance companies provide a number of specific guarantees. For example, they may guarantee a death benefit or an annuity payout option that can provide income for life. These guarantees are only as good as the insurance company that gives them.
- Market Risk – The possibility that stock fund or bond fund prices overall will decline over short or even extended periods. Stock and bond markets tend to move in cycles, with periods when prices rise and other periods when prices fall.
- Principal Risk – The possibility that an investment will go down in value, or "lose money," from the original or invested amount.

5. Mutual Funds Risk

Mutual funds can offer the advantages of diversification and professional management. But, as with other investment choices, investing in mutual funds involves risk and fees and taxes will diminish a fund's returns.

But mutual funds also have features that some clients might view as disadvantages, such as:

- **Costs despite Negative Returns** — Clients must pay sales charges, annual fees, and other expenses) regardless of how the fund performs. And, depending on the timing of their investment, clients may also have to pay taxes on any capital gains distribution they receive — even if the fund went on to perform poorly after they bought shares.
- **Lack of Control** — Investors typically cannot ascertain the exact make-up of a fund's portfolio at any given time, nor can they directly influence which securities the fund manager buys and sells or the timing of those trades.
- **Price Uncertainty** — with an individual stock, you can obtain real-time (or close to real-time) pricing information with relative ease by checking financial websites or by calling your advisor. You can also monitor how a stock's price changes from hour to hour. But with a mutual fund, the price you purchase or redeem shares for will typically depend on the fund's NAV, which the fund might not calculate until many hours after you've placed your order. In general, mutual funds must calculate their NAV at least once every business day, typically after the major U.S. exchanges close.

The following is a list of some general risks associated with investing in mutual funds.

- **Country Risk** - The possibility that political events (a war, national elections), financial problems (rising inflation, government default), or natural disasters (an earthquake, a poor harvest) will weaken a country's economy and cause investments in that country to decline.
- **Currency Risk** -The possibility that returns could be reduced for Americans investing in foreign securities because of a rise in the value of the U.S. dollar against foreign currencies. Also called exchange-rate risk.
- **Income Risk** - The possibility that a fixed-income fund's dividends will decline as a result of falling overall interest rates.
- **Industry Risk** - The possibility that a group of stocks in a single industry will decline in price due to developments in that industry.
- **Inflation Risk** - The possibility that increases in the cost of living will reduce or eliminate a fund's real inflation-adjusted returns.
- **Manager Risk** -The possibility that an actively managed mutual fund's investment adviser will fail to execute the fund's investment strategy effectively resulting in the failure of stated objectives.
- **Market Risk** -The possibility that stock fund or bond fund prices overall will decline over short or even extended periods. Stock and bond markets tend to move in cycles, with periods when prices rise and other periods when prices fall.

- Principal Risk -The possibility that an investment will go down in value, or "lose money," from the original or invested amount.

6. Overall Fund Risk

- Clients need to remember that past performance is no guarantee of future results. All funds carry some level of risk. You may lose some or all of the money you invest, including your principal, because the securities held by a fund goes up and down in value. Dividend or interest payments may also fluctuate, or stop completely, as market conditions change.
- Before you invest, be sure to read a fund's prospectus and shareholder reports to learn about its investment strategy and the potential risks. Funds with higher rates of return may take risks that are beyond your comfort level and are inconsistent with your financial goals.

While past performance does not necessarily predict future returns, it can tell you how volatile (or stable) a fund has been over a period of time. Generally, the more volatile a fund, the higher the investment risk. If you'll need your money to meet a financial goal in the near-term, you probably can't afford the risk of investing in a fund with a volatile history because you will not have enough time to ride out any declines in the stock market.

7. Stock Fund Risk

Although a stock fund's value can rise and fall quickly over the short term, historically stocks have performed better over the long term than other types of investments — including corporate bonds, government bonds, and treasury securities.

Overall "market risk" poses the greatest potential danger for investors in stocks funds. Stock prices can fluctuate for a broad range of reasons, such as the overall strength of the economy or demand for particular products or services.

Not all stock funds are the same. For example:

- Growth funds focus on stocks that may not pay a regular dividend but have the potential for large capital gains.
- Income funds invest in stocks that pay regular dividends.
- Index funds aim to achieve the same return as a particular market index, such as the S&P 500 Composite Index, by investing in all — or perhaps a representative sample — of the companies included in an index.
- Sector funds may specialize in a particular industry segment, such as technology or consumer products stocks.

8. Technical Analysis risk

- Technical analysis is derived from the study of market participant behavior and its efficacy is a matter of controversy.

- Methods vary greatly and can be highly subjective; different technical analysts can sometimes make contradictory predictions from the same data.
- Models and rules can incur sufficiently high transaction costs.

Risk Tolerance – the extent to which an investor is willing to accept more risk in exchange for the possibility of a higher return. An investor with a high risk tolerance is likely to invest in securities, such as stocks in startup companies, and is willing to accept the possibility that the value of his/her portfolio will decline, at least in the short-term. An investor with a low risk tolerance, on the other hand, tends to invest predominantly in stable stocks and/or highly-graded bonds. One's risk tolerance is subjective and may vary according to age, needs, goals, and even personal dispositions

Third Party Money Manager— the professional management of various securities (shares, bonds and other securities) and assets (e.g., real estate), to meet specified investment goals for the benefit of the investors. The managers are not the actual advisers working with the investor. Investors may be institutions (insurance companies, pension funds, corporations, individuals etc.

Total Annual Fund Operating Expense — the total of a fund's annual fund operating expenses, expressed as a percentage of the fund's average net assets. You'll find the total in the fund's fee table in the prospectus.

Unit Investment Trust (UIT) — a type of investment company that typically makes a one-time "public offering" of only a specific, fixed number of units. A UIT will terminate and dissolve on a date established when the UIT is created (although some may terminate more than fifty years after they are created). UITs do not actively trade their investment portfolios.
